## **SPECIAL REPORT**

### **Examining Annual Targets for Indicator 3B: Proficiency for Children with IEPs on Statewide Assessments**

September 2022

The Office of Special Education Programs (OSEP) at the U.S. Dept. of Education has posted [each state's 2022 State Performance Plan \(SPP\) and Annual Performance Report \(APR\)](#) which includes new annual targets for results and compliance indicators 1-17 for years 2020 through 2025. Details are available [here](#).

This special report examines each state's annual targets for Indicator 3B which measures the proficiency for children with IEPs on state assessments in reading and math in grades 4, 8 and high school. As noted in this [recent blog](#), using the performance of students with IEPs on the state assessment in 2020-2021 as the baseline for establishing new 6-year targets carries serious implications.

Despite the myriad problems associated with the 2020-2021 assessment administration, the majority of states (36\*) used those results to set annual targets. The remaining states (15\*\*), recognizing the lack of reliability of 2020-2021 test results, used previous years as baseline to set annual targets.

Below are the state targets for Indicator 3B. As directed by OSEP, the state's [2025 target must reflect improvement over the baseline data](#). The amount of improvement varies dramatically across states. Some states established targets that reflect only minimal improvement over 6 years (AR, KS, ID, MT, NJ, NY, OK, VA) while other states established targets that reflect very substantial improvement (DE, NC, OH, PA, TX, WA).
